FOREWORD

Agricultural statistics and prices for Louisiana for the past seven years, 1983-1989, are presented in this series. State and parish data for crops and livestock are provided. Additionally, monthly and average prices received and paid, estimated annual index numbers of prices received, and farm income and expenses are included.

ACKNOWLEDGEMENTS

Appreciation is extended to Dr. Leo J. Guedry, Head of the Department of Agricultural Economics and Agribusiness, for reviewing the manuscript. Recognition to the Louisiana Agricultural Statistics Service Staff members who prepared the manuscript, Richard S. Geesey, Matt Guilbeau, Rex Patterson, Dana Dominguez, Judy French, Shirley Stansbury and Tina Teague.

AGRICULTURAL STATISTICS AND PRICES FOR LOUISIANA, 1983-1989

by

Hector O. Zapata, and David Frank ¹

Annual and monthly agricultural statistics and prices for Louisiana for the period 1983-1989 are provided in this publication. For some commodities such as cattle and calves and milk cows, data for 1990 are available, and therefore, incorporated in this publication.

The general content of this publication is outlined as follows. Tables 1 through 4 provide state annual data on income and expenses. Farm numbers, size, and land use according to the last census of agriculture are presented in Table 5. Annual crop data (acreage, yield, production, disposition, price and value) and annual and monthly livestock data (livestock numbers, production, disposition, price and value) are presented in Tables 6 through 50. Tables 51 through 57 contain parish data on acreage, yield and production for cotton, rice, corn, soybeans, wheat, sorghum, and sugar cane; and Tables 58 and 59 contain parish data on cattle numbers. Annual price indexes and monthly and annual prices received and paid by Louisiana farmers are presented in Tables 60 through 68. Tables with blank spaces indicate data are no longer published or are not available at the time this report was prepared.

All tables contain the specific primary sources from which the data on this report were obtained. The Louisiana Agricultural Statistic Service of the U.S. Department of Agriculture at Baton Rouge cooperates directly providing the primary data. Data prior to 1982 are available in one previous research report ² published by the Department of Agricultural Economics and Agribusiness, Louisiana Agricultural Experiment Station, Louisiana State University Agricultural Center, Louisiana State University.

¹Dr. Zapata is Assistant Professor in the Department of Agricultural Economics and Agribusiness, Louisiana Agricultural Experiment Station, Louisiana State University Agricultural Center. Mr. David Frank is the State Statistician in charge, Louisiana Agricultural Statistics Service, United State Department of Agriculture, Baton Rouge, Louisiana.

THE DEPARTMENT OF AGRICULTURAL ECONOMICS AND AGRIBUSINESS
LOUISIANA STATE UNIVERSITY AGRICULTURAL CENTER
LOUISIANA STATE UNIVERSITY

The Department of Agricultural Economics and Agribusiness carries on an extensive and coordinated program of teaching, organized research and public service in a wide variety of professional subject matter areas.

Subject matter areas include:

Agricultural business management	Land and water economics
Farm organization and management	Applied computer programming
Statistical analysis of agricultural data	Cooperatives
Resource, rural and community development	Price analysis
Environmental economics and ecology	Tropical resource development
Marketing - (general and commodity)	International trade
Agricultural policy and public programs	Agricultural credit and finance

The department's research in these areas is part of the organized research program of the Louisiana Agricultural Experiment Station, a division of the Louisiana State University Agricultural Center. Much of the research is in cooperation with other state research stations, the USDA, and other State and Federal agencies.

The combination of teaching, organized research and service provides an efficient, effective and productive use of resources invested in higher education and service to the public. Emphasis in research is on solving practical problems important to various segments of the economy. Research results are made available for immediate use in the Louisiana Cooperative Extension Service and other educational and action agencies, including the Department of Vocational Agricultural Education, the Farmers Home Administration, the Soil Conservation Service, the Federal Farm Credit System, other government agencies, farm organizations, business and industrial firms, as well as individuals, receive and use the Experiment Station's research results in the economics of land use, farm credit, resource, community and rural development, agricultural production and marketing, agribusiness, cooperatives, and public policy.

The department's coordinated teaching, research and service program provides professional training for careers in a wide variety of occupations in education, agribusiness, industry and government service. Departmental course work is supplemented by courses in other disciplines, particularly in the College of Agriculture and the College of Business Administration. Academic programs lead to degrees at three levels: Bachelor of Science, Master of Science, and Doctor of Philosophy. Course work in all curricula provides knowledge of tools and techniques useful for decision making. Emphasis in the undergraduate program centers on developing the student's managerial ability. The graduate program builds on the undergraduate background, strengthening basic knowledge and adding more sophisticated analytical skills and business capabilities.
